# HOW GRADE CONTROL PRODUCTS KEEP YOU OPERATIONAL

**T**he Team at Grade Control Products (GCP) understands the value of quality products and uptime on the jobsite. With this in mind, GCP put together a product line that not only supports the leaders in the industry but is made to withstand tough job conditions while optimizing the time you spend working. Whether it's cables, chargers, batteries, handles, brackets, or mounts, GCP knows how important it is to trust the products that keep you working.

GCP formed to support the construction technology industry by creating a product line that not only improves the technology you are already using, but boosts the reliability and reduces your down time. The team at GCP is made up of a group of people with backgrounds in construction, survey, and construction technology.

The experts at GCP have recognized that the price of replacing failing lower quality products is far too great, and in the end, erodes profit from the job. The solution: offer products that are designed to withstand the riggers of day to day use and to reduce occasional mishaps. All of our products are inspired by people like you to ensure we offer the best value to our clients.

Don't hesitate to reach out if you have any questions. Thanks for stopping by to get to know us a little better.
